**Annexure 1**

Sr No.	Item Name	Author	Specifications	Qty.
1.	Examining for Aphasia - Fourth Edition	Leonard L. LaPointe and JonEisenson	Based on Jon Eisenson's previous editions, the EFA-4 has been completely revised to evaluate the cognitive, personality, and linguistic modifications that are associated with acquired aphasia. The EFA-4's subtests help determine areas of strength and weakness for receptive and expressive functions as well as for the communication processes that underpin language use.  EFA-4 tests visual, auditory and tactile recognition as well as auditory and reading comprehension of words, sentences, and paragraphs. Expressive and productive tasks include simple skills, automatic language, arithmetic computations, and language items that parallel those for receptive tasks. This edition incorporates aspects of the examinee's social history, acknowledging the contemporary integration of social models of aphasia with attention to treatment planning that focuses on ICF guidelines: restoration of activities and participation in daily life.	01
2.	MIRBI-2: The Mini Inventory of Right Brain Injury - Second Edition	Patricia A. Pimental and Jeffrey A. Knight	The MIRBI2 lets you quickly screen clients for neurocognitive deficits associated with Right hemisphere lesions. Its development meets the need for a brief, standardized, Right-Brain Injury screening instrument that yields severity levels for deficit areas. Test reviews and professionals' comments from the field were incorporated into the new edition. A caliper is included for convenience and to standardize administration across examiners. The MIRBI2 was normed on 128 Right-Brain injured people. Reliability was estimated by coefficient alpha (.84). All item discrimination coefficients exceeded .3 acceptable levels and ranged from .37 to .81, median: .57. Inter-rater reliability was .99	01
3.	Boston Assessment of Severe Aphasia (BASA)	Nancy Helm-Estabrooks, Gail Ramsberger, Alisa R. Morgan and Marjorie Nicholas	This aphasia test is designed to be given to post stroke cases soon after the onset of symptoms, preferably at bedside. It can be given long before most other assessments are appropriate. The BASA probes the spared language abilities of persons with severe aphasia and provides diagnostic information needed for immediate treatment. The 61 items measure a wide variety of tasks and modalities, including auditory comprehension, bucco-facial or limb praxis, gesture recognition, oral and gestural expression, reading comprehension, writing, and visual spatial tasks.	01
4.	Assessment of Intelligibility of Dysarthric Speech	Kathryn Yorkston, David Beukelman and Charles Traynor	Assessment of Intelligibility of Dysarthric Speech (AIDS) is a tool for quantifying single-word Intelligibility, sentence Intelligibility, and speaking rate of adult and adolescent speakers with dysarthria.  Standard protocols containing speaker tasks, recording techniques, and listener response formats are employed in order to obtain a variety of Intelligibility and communication efficiency measures. Reproducible protocols are included in the back of the Examiner's Manual.	01

**INQUIRY NO. Admin/Gen/12-08/2021-AIIMS.JDH**

5.	Frenchay Dysarthria Assessment, 2nd Ed.	Pamela Enderby and Rebecca Palmer	The second edition of Frenchay Dysarthria Assessment (FDA-2) includes new powerful knowledge about motor speech disorders and their contribution to neurological diagnosis. This updated edition remains a well-established test for the measurement, differential description, and diagnosis of Dysarthria. It can be used in international research, as well as all clinical settings. The test results can be recorded on the FDA-2 Rating Form, indicating both the client's strengths and weaknesses. The Rating Form also allows the clinician to compare the patient's performance across all the items. Normative data are reported for adults without Dysarthria as well as patients with specific Dysarthria associated with confirmed medical diagnoses.	01
6.	Quick Assessment for Apraxia of Speech	Tanner & Culbertson	This instrument takes 10 minutes to administer and includes tasks that provide clinically relevant information about oral and verbal apraxia. The instrument offers an organized, step-by-step method for quickly assessing the presence or absence of the motor speech programming disorders.	01
7.	Verbal Dyspraxia Profile	Judy Jelm	The perfect companion to Judy Jelm's <b>A Parent Guide to Verbal Dyspraxia</b> . This resource includes: <ul style="list-style-type: none"> <li>• An overview of oral- motor development as it relates to feeding and speech</li> <li>• Tables comparing patterns of movement noted in feeding to those used in speech</li> <li>• Verbal Dyspraxia: Clinical Picture Checklist to assist with the diagnosis of children who may demonstrate Verbal Dyspraxia</li> <li>• Automatic and Imitative oral-motor movement checklists for jaw, lips/cheeks and tongue.</li> </ul>	01
8.	TOLD-P:5: Test of Language Development-Primary: Fifth Edition	Phyllis L. Newcomer • Donald D. Hammill	The TOLD-P:5 assesses spoken language in young children. It is well constructed, reliable, practical, research-based, and theoretically sound. Professionals can use the TOLD-P:5 to (1) identify children who are significantly below their peers in oral language proficiency, (2) determine their specific strengths and weaknesses in oral language skills, (3) document their progress in remedial programs, and (4) measure oral language in research studies. Subtests and Composites The TOLD-P:5 has six core subtests and three supplemental subtests which measure various aspects of oral language are described below. The results of these subtests can be combined to form composite scores for the major dimensions of language: semantics and grammar; listening, organizing, and speaking; and overall language ability.	01
9.	TOAL-4: Test of Adolescent and Adult Language- Fourth Edition	Donald D. Hammill	<i>The Test of Adolescent and Adult Language - Fourth Edition (TOAL-4)</i> is efficient, reliable, and valid. It was designed to measure spoken and written language abilities of adolescents and young adults, with varying degrees of knowledge of the English language. It was normed on 1,671 individuals in 35 states, all between the ages of 12-0 years and 24-11. It is nonbiased in regard to gender, race, and ethnicity.	01

**INQUIRY NO. Admin/Gen/12-08/2021-AIIMS.JDH**

10	Stuttering Severity Instrument – Fourth Edition	Glyndon D. Riley	<p>Stuttering Severity Instrument– Fourth Edition (SSI-4) is a reliable and valid norm- referenced stuttering assessmentthat can be used for both clinical and search purposes. It measuresstuttering severity in both children and adults in the four areas of speech behavior: frequency duration physical naturalness of the individual’s speech.</p> <p>Frequency is expressed in percent syllables stuttered and converted to scale scores of 2-18.Duration is timed to the nearest one tenth of a second and converted to scale scores of 2-18.The four types of Physical Concomitants are and converted to scale scores of 0-20. The SSI-4 can also be used in conjunction with the Stuttering Prediction Instruments for Young Children</p>	01
11.	Test of Childhood Stuttering	Ronald B. Gillam, Kenneth J. Logan, Nils A. Pearson	<p>The main purposes of the TOCSare to (1) identify children who stutter, (2) determine the severity of a child's stuttering, and (3) document changes in a child's fluency functioning over time. It can also be used as a tool in research on childhood stuttering. The TOCS is comprisedof three major components:</p> <p><b>The Standardized SpeechFluency Measure</b></p> <ul style="list-style-type: none"> <li>• Four speech fluency tasks are used to identify children who stutter and rate the severity oftheir stuttering. <ul style="list-style-type: none"> <li>Rapid Picture Naming— Children are to name a series of 40 pictures as quickly as possible. This determines how fluently children produce single words in a time-stressed context.</li> <li>• Modeled Sentences— Children are shown two pictures, side-by-side, differing in one important detail. The examiner says a sentence about one of the pictures. Children are to produce sentences that contain the same syntactic structure as the sentence the examiner has modeled. This evaluates children's ability to speak fluently in a context in which sentences that vary in syntactic complexity must be formulated and then spoken.</li> <li>• Structured Conversation—Children are asked to answer open-ended questions about a sequence of eightpictures. This evaluates children's ability to speak fluently in a dialogue context.</li> <li>• Narration—Children are to generate a story that isbased on the picture cards used in "Structured Conversation." This assesses children's ability to speak fluently in a monologue context.</li> </ul> </li> </ul>	01
12.	Token Test for Children- Second Edition (TTFC-2)	Ronnie L. McGhee David J. Ehrler • Frank DiSimoni	<p>The Token Test for Children- Second Edition (TTFC-2) is a reliable and effective screening measure for assessing receptive language in children ages 3 years0 months to 12 years 11 months. Administration is rapid, yielding raw scores, standard scores, percentile ranks, and age equivalents.</p> <p>TTFC-2 Tokens Kit (20) Price: \$ 38.00 (Add To Cart)Description</p> <p>Ages: 3-0 to 12-11</p> <p>Testing Time: 10-15 minutesAdministration: Individual</p> <p>TTFC-2 comes with 20 small tokens, varying in size (large and small), shape (round and square), and color (blue, green, yellow, white, and red). The child is given three opportunities to practice.</p> <p>The administrator then gives thechild 46 linguistic commands, to which they must respond by manipulating the tokens. The commands are arranged in four parts of increasing difficulty, and must be administered inconsecutive order.</p>	01
